Experience

WEB DEVELOPMENT

Auth + CRUD — 2025 - Present

This is a basic website that use technology Next.js to build as frontend and Laravel with Sanctum (PHP) as a backend to build a simple user authentication and CRUD features

FULL STACK WEB DEVELOPMENT

Hotel Managerment System — 2024 - 2025

I participated in a group project with four people to develop hotel booking platform with complete user journey from hotel browsing to secure reservation completion. Built responsive Next.js frontend. Architected Laravel backend with RESTful APIs for hotel management, payment processing, and user authentication. Designed relational database using Eloquent ORM. Tech Stack: Next.js, JavaScript, Tailwind CSS, Laravel.

FULL STACK WEB DEVELOPMENT

Slack-App-Clone — 2024- 2025

Followed along with advanced tutorials on YouTube to build a full-stack Slack application using modern web technologies. Implemented OAuth 2.0 for secure Slack workspace. Utilized Convex as a serverless backend for logic and data management. Designed a clean, responsive UI with Next.js, Convex, OAuth 2.0, Tailwind CSS, and TypeScript.
